

Smart Lock

is a secure, safe way to lock your home.

Why Smart Lock?

Smart Lock will put your mind at ease with the following solutions.

- Your key cannot be duplicated.
- No need to worry about oversights by a security company.
- You can lend your key easily at any time.

Main Features

Lock and unlock your door

Smart Lock allows you control your existing physical lock via your smartphone—simply install it on your door and download the app and you can lock and unlock your door.

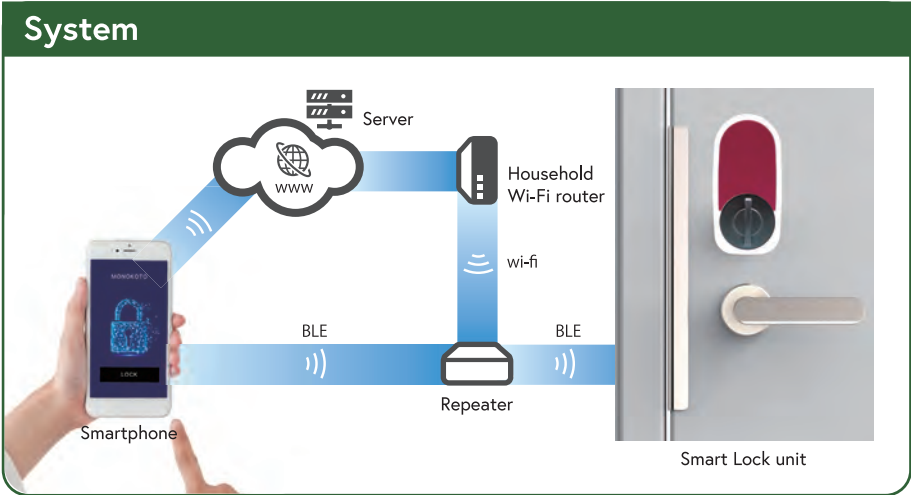

Check when your door has been locked and unlocked

Smart Lock records a history so that you can check when your door has been locked and unlocked and who has operated the lock. Our unit with a repeater also records when the door was locked and unlocked with the physical key.

Control guest access

You can allow access by people you trust—specify the time and guest and send a guest key to allow your guest to lock and unlock your door using their smartphone.

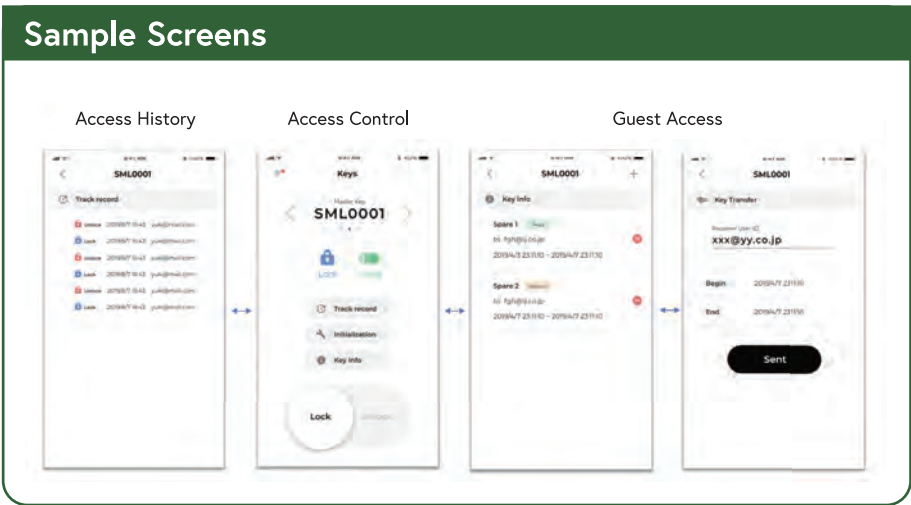

Guest access expires automatically at the end of the specified period and can be canceled by you or your guest at any time.

Main Purposes

Smart Lock is ideal for these settings:

- Guest houses, hotels and other accommodation facilities
- Rental units such as offices and apartments
- Shared spaces with multiple users, such as warehouses and offices
